

Designed For Running in Nature

We design!

It's as if you are exercising in nature wherever you happen to be and whenever you feel like it. That is how we design.

Designed by Science

That is why we design by science. We design it so that you can exercise freely and comfortably as if exercising in nature. We analyze the pressure on the soles of the feet when in contact with the ground, the movements of the muscles, the angle of the vertebrae, and the movements of the upper body. We have also covered all the sciences and experiences, including biomechanics, motion physics, and exercise physiology. That is how we design by science.

Running!

Is running on a flat track the same as running up a mountain or along a forest track full of mud and rocks? We have been studying how to recreate these effects indoors. That is how we design by science. DRAX is different!

DRAXFIT+

Users can experience the feeling of running in nature with this eco-friendly treadmill that naturally adjusts the speed according to the user's walking or running speed.

NON-MOTORIZED TREADMILL

Features & Benefits

Curved Design

Curved design with higher front and rear roller and lower center position makes it so when the user takes bigger steps the speed increases, with smaller steps the speed decreases, and when the user stands on the center, the treadmill slows to a stop.

Slat Belt Design

Unlike a conventional treadmill, it uses thick and strong caterpillar type slats. There is no running board under the belt, therefore there are no concerns for shock to the human body while running.

Running On Nature

When the user take steps on the curve, it stimulates the body to start putting pressure into the big toe first, imitating the stimulation of running outside. Over 20- 30% more efficiency guaranteed.

Bluetooth Communication (Optional)

Through Bluetooth communication (BLE4.0) and by DRAX designed smartphone APP, you can display all kinds of exercise information on your smartphone or LCD monitor. You can even manage exercise information with IoT technology.

Product Information

MAX. SPEED	LIMITLESS (SELF-PACED)
DIMENSIONS	784 x 1825 x 1608 mm (W x L x H)
WEIGHT	130 kg
MAX. USER WEIGHT	180 kg
WARRANTY	12 MONTHS
GARANZIA	12 MESI
